### PROPERTY OVERVIEW

A rare opportunity to acquire a substantial 5,000 m<sup>2</sup> residential plot in the sought-after Los Almendros urbanisation, Benahavís. The site currently hosts a 1970s villa and ancillary buildings (total 453 m<sup>2</sup>), offering ample scope for redevelopment. With a building coefficient of 0.20, the plot potentially allows for up to 1,000 m<sup>2</sup> of above-ground construction – ideal for creating a modern luxury villa.

Set within a secure, low-density gated community, this plot offers exceptional privacy combined with open golf and mountain views. The existing villa is ideal for either a full redevelopment or a high-quality renovation.

### DEVELOPMENT POTENTIAL

There are two attractive development routes:

#### 1. Full Redevelopment (Most Popular Option)

- Build up to 900 m<sup>2</sup> above ground (plus potentially a basement)
- Maximum height: 2 floors / 7 metres
- Minimum 3 m setbacks from boundaries
- Estimated construction cost for a modern 900 m<sup>2</sup> villa: €900,000 - €2,000,000 (dependent on finish)
- Demolition/preparation allowance: €100,000
- Expected resale value for a new 900 m<sup>2</sup> villa: €5.4M–€6.75M
- Likely ROI: ~25–30% based on current market conditions

#### 2. Renovation & Extension of Existing Villa

- Existing structure: 453 m<sup>2</sup>
- Potential to add a second floor or extend within the 900 m<sup>2</sup> allowance
- Renovation budgets vary depending on scope, but typically €500,000–€600,000 for a full modernisation
- Faster project timeline and lower upfront cost
- Ideal for buyers wanting a personalised home without a full rebuild
